Central Agency for Public Mobilization And Statistics

12.4% increase index of Manufacturing and during November 2016

Central Agency for public mobilization and statistics (CAPMAS) issued on 14/ 1/ 2017 metadata of the production index of manufacturing and extractive industries for November 2016.

- The index of manufacturing (without crude oil and petroleum products) **140.46** during **November 2016 (primary)** compared to **124.99** during **October 2016 (final)** a increase of 12.4 % .
- Due to the rise in the dollar exchange rate against the Egyptian pound.

The following figure shows the index number data from Nov. 2015 to Nov.2016

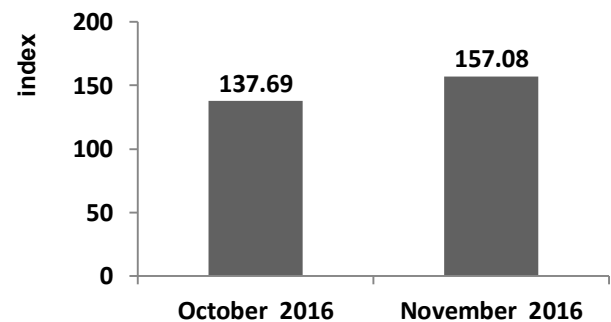

An increase at the level of the following economic activities:

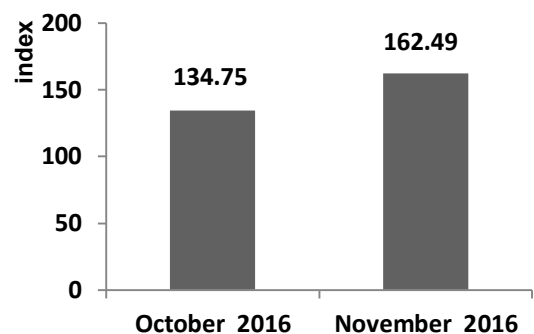

Manufacture of food products

- Total index for manufacture of food products reached 157.08 during November 2016, compared to 137.69 during October 2016, an increase of 14.1% due to the increase in the production of oil food refining and the increase of the demand of animal feed and bran.

Manufacture of chemicals and chemical products

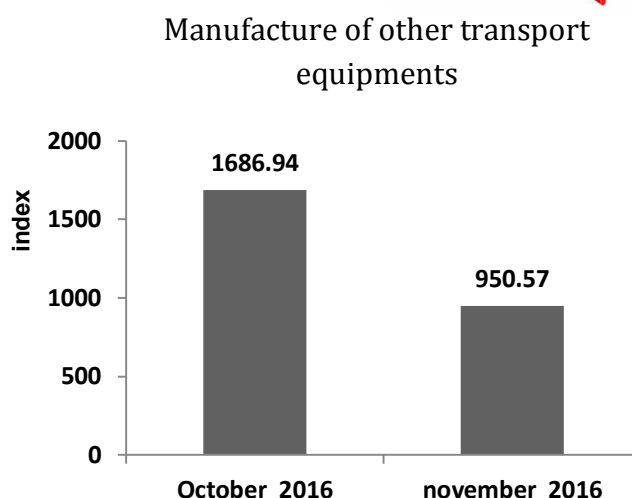

- Total index of manufacture of chemicals and chemical products reached 162.49 during November 2016, compared to 134.75 during October 2016, an increase of 20.6 % due to the seasonality of personal care products and the absence of malfunction in chemicals production lines.

A decrease at the level of the following economic activities:

- Total index of manufacture of other transport equipment reached 950.57 during November 2016, compared to 1686.94 during October 2016, an decrease of 43.7 % due to decrease in importation orders and subway carriages production.

- Total index for other manufacturing industries (office tools) reached 51.72 during November 2016, compared to 62.94 during October 2016, a decrease of 17.8% due to decrease in export rates and the end of mid-year education season .
