

## 11.2 billion m<sup>3</sup> is the total amount of produced pure water in 2021/2022

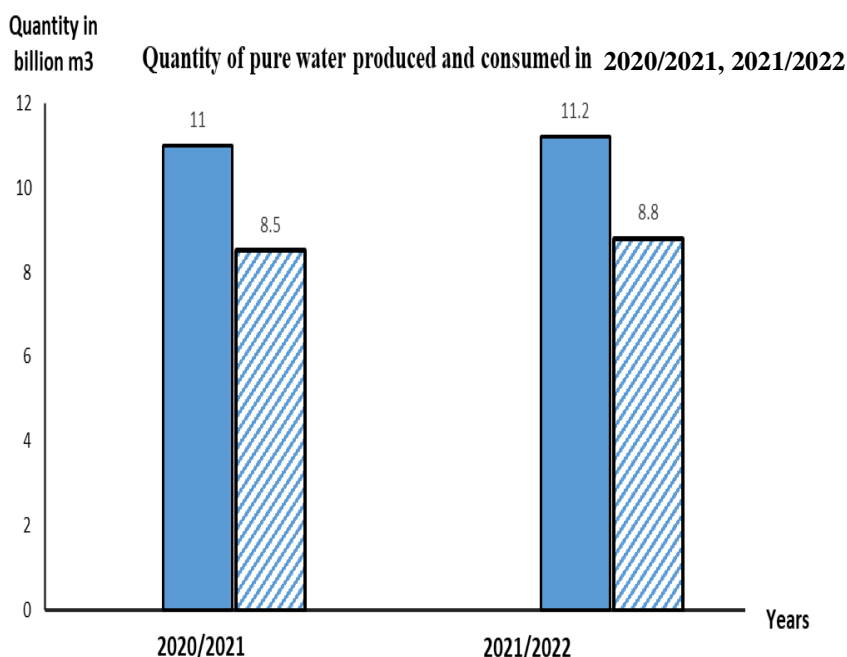

Central Agency for Public Mobilization and Statistics issued today 19 / 6/ 2023

"Annual bulletin of drinking water and sanitation statistics in 2021/2022".

The most important indicators were the following:

### Pure drinking water

- Total quantity of produced pure water reached 11.2 billion m<sup>3</sup> in 2021/2022 compared to 11 billion m<sup>3</sup> in 2020/2021.
- Total number of pure water stations Produced from surface water (Nile River) reached 1115 stations with production capacity of 9.9 billion m<sup>3</sup> in 2021/2022.
- Total number of pure water stations produced from artesian water is 1584 stations with a production capacity of billion m<sup>3</sup> in 2021/2022.
- Total number of pure water stations produced from wells water is 38 stations with a production capacity of 0.04 billion m<sup>3</sup> in 2021/2022.
- Total number of pure water stations produced from the sea (desalination) is 54 stations with a production capacity of 0.2 billion m<sup>3</sup> in 2021/2022.

- Total quantity of consumed pure water reached 8.8 billion m<sup>3</sup> in 2021/2022 compared to 8.5 billion m<sup>3</sup> in 2020/2021.
- Per capita average of produced pure water is 106.9 m<sup>3</sup> in 2021/2022 compared to 106.8 m<sup>3</sup> in 2020/2021.
- Per capita average of consumed pure water is 83.9 m<sup>3</sup> in 2021/2022 compared to 82.6 m<sup>3</sup> in 2020/2021.
- Percentage of water loss was 26.5% in 2021/2022 compared to 27.9% in 2020/2021 a decrease by 5%.
- Conformity percentage of samples submitted for test of holding company for water and sewage production stations reached 99.2%, whereas the percentage of Suez Canal Authority production stations reached 95.9% in 2021/2022.
- Conformity percentage of samples submitted for test of holding company for water and sewage distribution networks reached 97.1%, while it reached 96.3% for distribution networks following Suez Canal Authority in 2021/2022.

### **Sewage**

- Total number of treated sewage stations reached 484 stations in 2021/2022, compared to 475 stations in 2020/2021, an increase by 1.9 %.
- Total amount of treated sewage reached 5.23 billion m<sup>3</sup> in 2021/2022.
