## Central Agency for Public Mobilization And Statistics

On the Occasion of the world Meteorological Day

3.3% an increase in the total amount of electricity generated of renewable energy in 2017/2018

Central Agency for Public Mobilization and Statistics issued on 23 / 3 / 2020

A press statement on the occasion of the World Meteorological Day, which is celebrated on the twenty-third of March each year.

Since the establishment of the World Meteorological Organization and starting implementation of meteorological agreement, to help countries to preserve environment and achieve sustainable development, Celebration will be held this year under the slogan

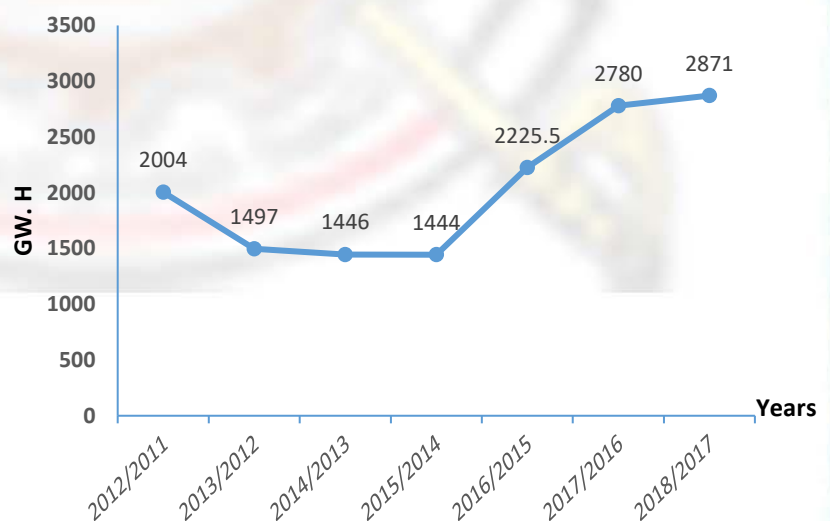

**" Count Every Drop, Every Drop Counts "**

This slogan is in line with the international community trend towards taking ambitious decisions and measures to address climate changes that affect all economic, social and environmental sectors, that threaten of sustainable development path.

The most important of these indicators: -

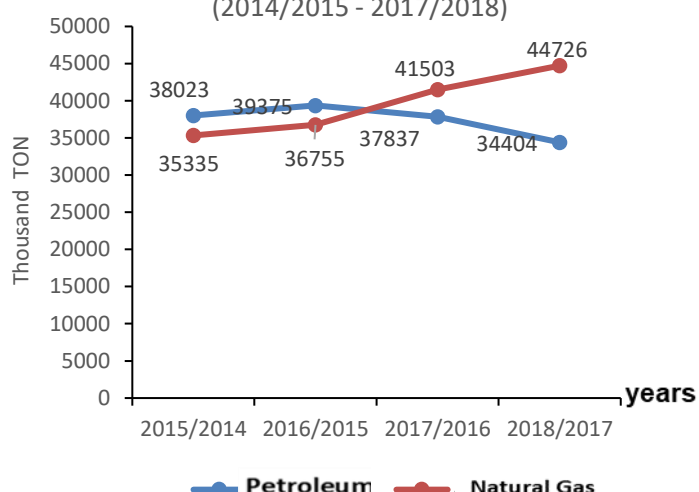

**Development of electric power generated from renewable energy (wind / solar) During the period (2011/2012 - 2017/2018)**

- Total amount of electric energy generated from new and renewable energy (wind /solar energy) was 2871 GWh in 2017/2018, compared to 2780 GWh in 2016/2017 an increase of 3.3%.

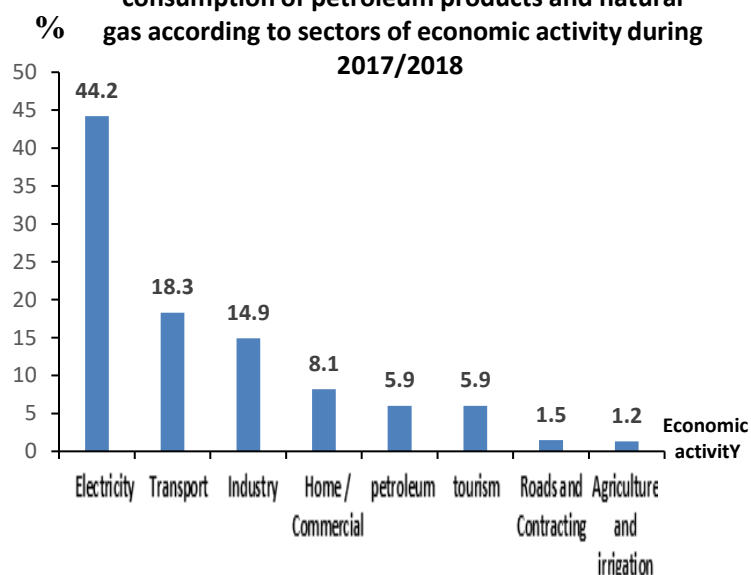

- Amount of domestic consumption of natural gas reached 44,726 thousand tons in 2017/2018, compared to 41503 thousand tons in 2016/2017, an increase of 7.8%.
- Amount of domestic consumption of petroleum products reached 34,404 thousand tons in 2017/2018, compared to 37,837 thousand tons in 2016/2017, a decrease of 9.1%..
- Total amount of emissions from domestic consumption of petroleum products and natural gas reached 206.75 million tons in 2017/2018, with the highest rate of emissions in electricity sector reaching 44.2%, followed by transportation sector by 18.3%, then industrial sector by 14.9% of the total amount of emissions.

Amount of local consumption of petroleum products and natural gas during (2014/2015 - 2017/2018)

Relative distribution of emissions from consumption of petroleum products and natural gas according to sectors of economic activity during 2017/2018

- Number of cars converted to work with natural gas reached 13732 cars in 2017/2018, bringing the total number of cars converted to work with natural gas to 243688 cars since the beginning of activity until the end of the 2017/2018 fiscal year.
