

# Press Release

## Central Agency for Public Mobilization And Statistics

### On the occasion of World Environment Day **%1.5 decrease in amount of emissions from of petroleum products and natural gas consumption in 2017/2018.**

Central Agency for Public Mobilization and Statistics issued on monday 3 /6 / 2019 a press statement on the Occasion of the World Environment Day, which is celebrated on 5/6 each year.

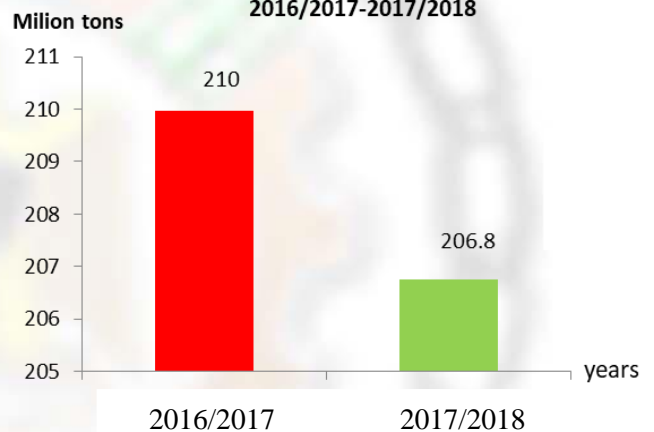

The celebration of World Environment Day began on June 5, 1972, Where the United Nations Environment Program (UNEP)"With a view to studying risks surrounding environment and actions to be taken to address these risks to preserve environment"

The celebration will be held this year under the slogan " **Beat Air Pollution**"

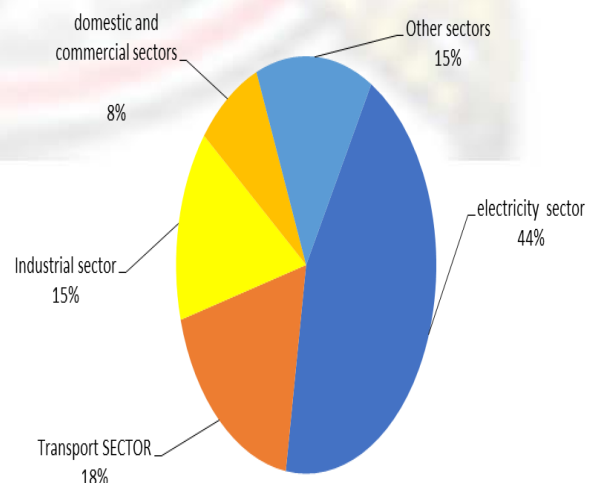

#### The most important of these indicators: -

- Amount of carbon dioxide emissions from petroleum products and natural gas consumption reached 206.8 million tons in 2017/2018, compared to 210 million tons in 2016/2017, a decrease of 1.5%.
- Electricity sector represents the main source of carbon dioxide emissions from petroleum products consumption, accounting for 44 % of total emissions, followed by transport sector by 18 %, industrial sector by 15%, domestic and commercial sectors by 8 % of total emissions in 2017/2018.

Amount of carbon dioxide emissions Resulting from petroleum products and natural gas consumption in 2016/2017-2017/2018

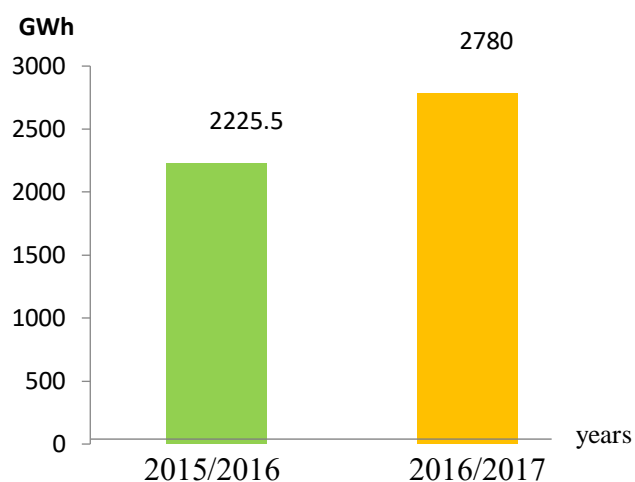

Percentage distribution of carbon dioxide emissions Resulting from petroleum products consumption in 2017/2018

- Total renewable generated energy (solar, saffron) in 2016-2017 increased to 2780 GWh compared to 2225.5 GWh in 2015-2016, an increase of 24.9%.

**Evolution of total amount of renewable generated electricity (solar – saffron wind)2015/2016-2016/2017**
