## Central Agency for Public Mobilization And Statistics

### **7.0% decrease in total transported quantities** **Of petroleum materials in 2017/2018**

Central Agency for Public Mobilization and Statistics (CAPMAS) issued On 6 / 3 / 2019 the annual bulletin for means of transport of petroleum materials 2017/2018 the most important indicators are as follows:

- Total quantities transported by means of transportation of petroleum materials reached 136.9 million metric tons in 2017/2018, while it was 147.1 million metric tons in 2016/2017, with a decrease by 7.0% This is due to lower volumes transported by railway and lorry tanks.

- Quantities transported by Sumid line reached 58.4 million metric tons in 2017/2018 which represents the highest transported quantities compared to 66.3 million metric tons in 2016/2017, with a decrease of 12%.
- Quantities transported in Lorries 17.4 million metric tons in 2017/2018 with average a transport cost per ton of 56 pounds, compared to 18.1 million metric tons in 2016/2017, with a decrease of 4.1%.
- The total length of pipelines of the main and internal oil pipelines company was 5.8 thousand km 2017/2018 compared to 5.6 thousand km in 2016/2017.

- Total quantities of petroleum materials Included (petroleum products. crude oil, condensates and Gasstove) through the pipelines of the Petroleum Pipeline Company reached 55.4 million tons In 2017/2018,with average a transport cost per ton (432, 210, 86, 349) pounds compared to 56.9 million tons in 2016/2017 , with a decrease of 2.7%.

- Quantities of transported crude oil and petroleum materials in coastal tankers reached 5.34 million metric tons, of which 5.3 million metric tons are raw, 0.04 million metric tons of products in 2017/2018 with average a transport cost per ton 129 pounds .

- Total volume of transported petroleum by railway tankers reached 385.1 thousand metric tons in 2017/2018 at with average a transport cost per ton 131 pounds, compared to 414.3 thousand metric tons in 2016/2017, with a decrease of 7.1%, which represents the least quantities transported.

- The total cost of transportation of petroleum products reached 19.9 billion pounds in 2017/2018
