

Press Release Central Agency for Public Mobilization And Statistics

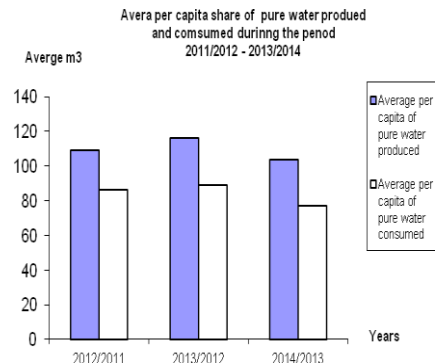

18/8/2015

103.4m³ average per capitashare of pure water produced in 2013/2014

Central agency for public mobilization and statistics issued Annual Bulletin drinking water and sanitation statistics 2013/2014

The most important indicators are as follows

The total amount of water produced at of the republic reached 11.7 billion m3 (pure and unpure) of which 8.9 billion m3 pure water by 75.6% of the total 2.8 billion m3 unpure water by 24.4% of the total in 2013/2014.

- The total production of the Holding Company for drinking water from pure water reached 8.8 billion m3 by 99.0% of the total pure water produced of which, 7.8 billion m3 of the Nile water by 89.1% billion m3 of water wells by, 10.8%, 0.01 billion m3 of sea water (desalination) 0.1% of the total, while the total production of the company from the un pure water reached 2.8 billion m3 in 2013/2014.
- The total production by Suez Canal Authority of pure water, reached 85 million m3 by 1% of the total produced pure water, and 6 million m3 un pure water by 0.2% of the total in 2013/2014.
- The average per capita of produced pure water reached 103.4 m3 in 2013/2014 compared to 116.3 m3 in 2012/2013a decrease of 11.1% because of population growth and lack of producing pure water to cope with such increase.
- The average per capita share of consumed pure water reached 76.9 m3 in 2013/2014 compared to 88.9 m3 in 2012/2013 a decrease of 13.5%.
- The amount of pure water consumed reached 6.6 billion m3 in 2013/2014 include 4.5 billion m3 for residential units by 68.9% , 2.1 billion m3 for non-residential units by 31.1% of the total compared to 7.4 billion m3 in 2012/2013 this is due to the increased loss proportion from 23.5% in 2012/2013 to 25.6% in 2013/2014 as a result of worn out of distribution networks and water leakage from pipes and illegal water connections.
