

On the occasion of the International Internet day

26.5% Increase in the number of Internet subscribers in 2014

Central Agency for public mobilization and statistics issued on 9 / 2 / 2015 a press release on the occasion of the international Internet day. As the world celebrates International Internet Day in the second Tuesday of February of each year, sponsored by the network (Insafe) as one of the initiatives of the EU project (SAFE BORDERS Project) and started to celebrate this day since 2005 more than 90 countries around the world celebrate it to promote a safe use of the Internet and mobile phones, especially among children and young people who are the targeted group for such day. This year's theme is "Let's create a better internet together" which aims to encourage respectful networking among Internet users.

Most important statistics are as follows:

- Total number Internet subscribers reached 42.31 million Subscribers in April 2014 versus 33.44 million subscribers in April 2013, an increase of 26.5%.
- The number of Internet subscribers by mobile phone reached 17.72 million Subscribers in April 2014 versus 11.35 million subscribers in April 2013, an increase of 56.1%.
- Percentage of families with access to the Internet at home is reached 53.35% in April 2014 versus 45.68% in April 2013, an increase of 7.67%.
- As is clear, the growing use of the Internet specially individual Internet by mobile phones, puts more burden on the family, society and the State regulatory bodies to protect youth as internet, launches a basic need for all groups in society.

Primarily responsibility is upon education bodies and family in educating children and youth on the need to respect others and to express their feelings and thoughts in manner Befitting by time-honored civilization, and the educated class of the society must contribute to the dissemination of awareness through social media sites to reach a large segment of Internet users. As for the Government Organization of communication and the Internet, it must enact laws to protect Web users from cybercrimes such as stealing credit card data and tempering with personal data and even libel offenses being spread on social media networks.
