

Press Release

Central Agency for Public Mobilization And Statistics

On The Occasion Of World Environment Day 58.2% Percentage of Increase in The Amount of Electric Power Generated by Renewable Energy (solar – wind) in 2018/2019

Central Agency for Public Mobilization and Statistics issued on 3/6/2021 a press statement on the Occasion of the World Environment Day, which is celebrated annually on the on 5/6.

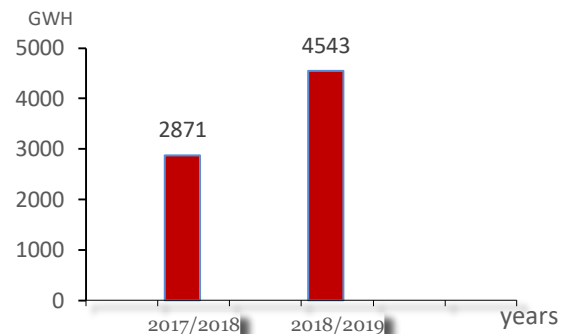

The celebration of World Environment Day began on June 5, 1972, Where the United Nations Environment Program (UNEP)"With a view to studying risks surrounding environment and actions to be taken to address these risks to preserve environment"

The celebration will be held this year under the slogan "Reimagine. Recreate.Restore ".

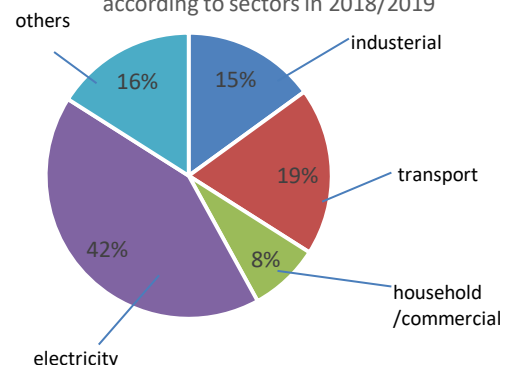

The most important of these indicators: -

- The amount of electric power generated by renewable energy (solar , wind) increased to 4543 GWh in 2018/2019, versus to 2871 GWh in 2017/2018 by an increase by 58.2%.
- The electricity sector represents the main source of carbon dioxide emissions resulted from petroleum products and natural gas consumption, reached 42% of total emissions, followed by transport sector by 19% , industrial sector by 15%, household /commercial sector by 8% , and other sectors reached 16% of total emissions in 2018/2019.

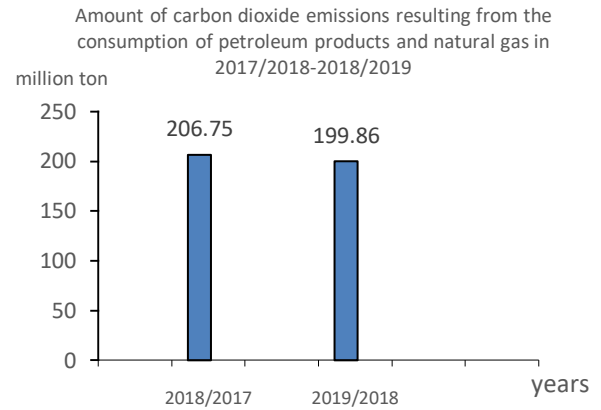

Amount of electric power generated by renewable energy(solar- wind) 2017/2018-2018/2019

Percentage distribution of carbon dioxide emissions Resulting from the consumption of petroleum products and natural gas according to sectors in 2018/2019

- **The amount of carbon dioxide emissions from consumption of petroleum products and natural gas reached 199.86 million tons in 2018/2019 compared to 206.75 million tons in 2017/2018, by a percentage decrease of 3.3%.**
