Press statement Central Agency for Public Mobilization And Statistics

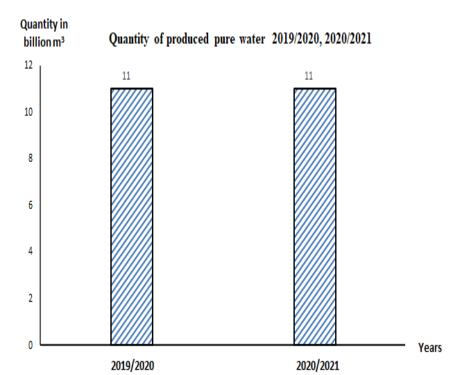

11 billion m³ is the total amount of produced pure water in 2020/2021

Central Agency for Public Mobilization and Statistics issued today 23 / 6 / 2022 "Annual bulletin of drinking water and sanitation statistics in 2020/2021". The most important indicators were the following:

Pure drinking water

- Total quantity of produced pure water reached 11 billion cubic meters in 2020/2021.
- Total number of pure water stations Produced from surface water (Nile River) reached 1119 stations with production capacity of 9.9 billion m³ in 2020/2021.
- Total number of pure water stations produced from artesian water is 1580 stations with a production capacity of billion m³ in 2020/2021.

• Total number of pure water stations produced from wells water is 45 stations with a production capacity of 0.08 billion m³ in 2020/2021.

- Total number of pure water stations produced from the sea (desalination) is 32 stations with a production capacity of 0.05 billion cubic meters in 2020/2021.
- Per capita average of produced pure water is 106.8 m3 in 2020/2021 compared to 110.1 m³ in 2019/2020.
- Per capita average of consumed pure water is 82.6 m3 in 2020/2021 compared to 84.7 m³ in 2019/2020.
- Percentage of water loss was 27.9% in 2020/2021 compared to 28.4% in 2019/2020 With a decrease of 1.8%.
- Conformity percentage of samples submitted for test of the holding company for drinking water and sewage production stations reached 99.3%, whereas the percentage of Suez Canal Authority production stations reached 96.8% in 2020/2021.
- Distribution Networks of the holding company reached 97.2%, while it reached 96.4% for distribution networks following Suez Canal Authority in 2020/2021.

Sewage

- Total number of treated sewage stations reached 475 stations in 2020/2021, compared to 455 stations in 2019/2020, an increase by 4.4%.
- Total amount of treated sewage reached 5.23 billion m³ in 2020/2021, compared to 5.13 billion m³ in 2019/2020, an increase by 1.9%.
